Directions for Using EasyBib
For an MLA Annotated Bibliography
1 of 3

Bibliographies are a list of sources utilized for research. There are different types of sources (i.e., website, encyclopedias, digital images, etc.). Each of these sources requires source specific information to complete a bibliography. Although Easybib is a wonderful online tool to assist you with your bibliography, you are responsible for include all available information regarding a source.

http://www.easybib.com/

WEBSITE

If you are citing a website, you will need to maintain two windows in your browser. You will need to enter the URL address in Easybib window and select Cite this button. A new window will open that requires you to enter additional information.

Once you enter the URL and click the Cite this button, the next window requires you to complete required information for a website that was not AUTOMATICALLY filled in by Easybib. Red text and an empty window with a red border easily identify the missing information.
BOOKS

If you are citing a book, you will need select Book option and enter the ISBN #, title of the book, or key words. ISBN # is your most efficient for citing book. Click the Cite this button. A new window will open that requires you to enter additional information.

Once you click the Cite this button, and like the website window, the next window requires you to complete required information for a book that was not AUTOMATICALLY filled in by Easybib. Red text and an empty window with a red border easily identify the missing information.

NEWSPAPER, JOURNAL, AND DATABASE

If you are citing a newspaper, journal, and/or database, you will need select the option specific to your source and enter the requested information. Once you click the Cite this button, a new window will open that requires you to enter additional information specific to your source type.

ALL 59 OPTIONS

Your research will often utilize a variety of sources. The Internet has made access to digital information more accessible. When you click on the All 59 options tab, you will see a list of source types. You select your source and complete the required information for that particular source.
